Gluttony is the source of all our infirmities, and the fountain of all our diseases. As a lamp is choked by a superabundance of oil, a fire is extinguished by excess of fuel, so is the natural health of the body destroyed by intemperate diet.

A certain minister of Scotland had a custom of writing the heads of his discourse on small slips of paper, which he placed on the Bible beforehim, to be used in succession. One day when he was explaining the second head, he got so excited in his discourse, that ne caused the enaring day when he was explaining the second head, he got so excited in his discourse, that ne caused the emsting alip to fall over the edge of the pulpit, though upperceived by himselt. On reaching the end of his second head, he looked for the third slip; but, alast it was not to be found. "Thirdly," he cried, looking round him with great anxiety. After a little pause, "Thirdly," again he exclaimed, but no thirdly appeared. "Thirdly, I say my brethren," pursued the bewildered clergyman; but not another word could he utter. At this point, while the congregation were partly sympathizing in his distress, and partly rejoicing in such a decisive instance of the impropriety of using notes in preaching—which has always been an improper thing in the Scotch clergy—an old woman rose up and thus addressed the preacher: "If I'm no mistaen, air, I saw thirdly flee out at the window a quarter of an hour average."

"Sarah, where's the dinner?" inquired the farmer somewhat anxiously. "I don't know whether it is done or not. there was no wood for a fire, so I hung it in the warmest place I could find. ### Catching a Canary.

The Saratoga Eagle describes a new method of catching escaped birds. It says a pet canary belonging to Mrs. W. S. Balch, escaped from the house and took refuge in the maple tree, at the south entrance of the town hall. Its recapture was a problem that for a time baffled all efforts at solution. Janitor Mingray however, who always ime baffled all efforts at solution. Janitor Mingay, however, who always "comes up to the scratch in case of an amergency," utilized the hose, and urning the water on the feathered ugitive, the latter soon dropped to the ground, and was eagerly caught by boys who were watching the sport. The new janitor's method of catching birds is deemed equal to the old-ashioned one of sprinkling salt on he if tails. Slaven's Effervescent California Fruit Salt

Suppose that the State never becomes able to redeem the bonds covering this isidebtedness, taking the case in the extreme, it certainly will always be able to pay the interest on them. Now, this is all of the Fund that can ever be expended unless the Constitution be changed. If you follow out the croakings of some of the critics, however, you would be led to the conclusion that the State will never be able to pay the interest on this debt. Conceive this to be the condition of our finances, and imagine it you can, that the State government no longer exists. The Manhattan S. M. Co. shipped from Austin Saturday 10 bars of bul-lion, weighing 707 pounds, valued at \$9,946 01.

The Carson Tribune says: Mr. Bryant has in his vault over \$500.000 of bullion, and there is enough silver in the Mint to keep the institution run-for the remainder of the year.

The Silver State says: At the July term, this year, the Board allowed bills aggregating \$7,127 32, making the sctual floating debt \$48,943 10, a reduc tion of \$2.286 78 in the year ending July 3d, '80. It is gratifying to know that, though times are unprecedentedly dull and money scarce, the county is not running in debt.

Last week a min named Thomas O'Callaghan had trouble with a Chinese Company, at Klamath River, at the mouth of Scott River, made an attack on the Chinamen, cutting the ropes to the cribs ready to sink for a wing dam, besides threatening them, they pushed him into the river and he was drowned. Orrin C. Ross, who owns' and farms the old Purdy place, is to be congraaround which he has ever harvested on his ranch. His barley is especially is of a peculiar nature. There is good; he will gather 85 bushels to the acre, which ought certainly to satisfy pan, and beneath that is quicksand. anybody. The GAZETTE would like The foundation will be laid as near to say the same good words for every farmer in the Valley.

The Carson Tribune of Saturday says: It is reported that certain Virginia sportsmen are in the habit of visiting Washoe Lake on Sundays and shooting ducks. A Virginia paper says: If any parties from this city are disturbing the ducks at this seasons it is safe to say that they do not deserve to be numbered among our sportsmen.

A Jail Crucker.

The Silver State of Friday says: John Flemmer was engaged in the rewery business at Battle Mountain. One night he attempted to give his creditors "leg bail." but was arrested when leaving town. He broke jail, out was again captured, and a secon time escaped from the lock-up in which he was confined. Last Monday he was arrested at Tuscarora, and imprisoned in the calaboose to await the crival of the Lander officers. On Fuesday night, with the aid of a moncey-wrench which some friend on the utside had given him, he removed the nuts from the hinges of the door and made his escape. It is thought hat ere this he has crossed the line into Idaho, and can bid defiance to his creditors, as they cannot follow nim outside of the limits of the State. As he was determined not to pay tkem, and they had to support him in jail, they do not lose much by his success in jail-breaking.

An Unfair Advantage. La Roche and Sooy seem to under stand human nature as well as art. They have a sliding picture on an up right staff, and direct the eyes of the sitter towards this point. The staff can be turned, however. When a young lady is to be taken, she is comforted by the counterfeit presentment of a lovely young man, and she looks like a moist-nosed school boy in front of a confectioner's window. When a young man is the camera's victim, the staff is turned and he beholds a bewitching damsel. The GAZETTE local editor had a picture taken yesterday, while gazing upon this snare, and the photographer stated publicly that he looked like a little lunet charmed while on its nest.

Gen. Hatch and Don Barker are laying out the lines for the Asylum building to-day. Mr. Frazier is driving she was the victim of a conspiracy stakes and Hymers is holding bunches see through. Frazer's Foundry.

Frazer's foundry is running along as smoothly as could be. The water wheel gives abundant pow r and the wire rope stretched high over the track in its large revolving pulleys makes quite a feature of the establishment. The men were at work this morning brushing up an immense plate that stood tilted up on its edge. Everyone there is busy and there seems to be plenty of work.

The man recently arrested by C.W Jones as an escaped convict from Folsom, answers the description in soil. They are dying in large numevery particular. He declares his in- bers, and are taking wing towards the ocence and talks about writs etc., which seemes to show that he is ill at ease. RICHMOND-ALBION.

The Present Situation of the Great ng case now in Trial in Enreka.

Saturday night dispatches say: In the Richmond-Albion case the legal question regarding the admissibility of testimony assailing the vadility of the St. George patent held by the Richmond Company is still under con-sideration. W. S. Wood, of San Francisco, for the Albion, occupied the whole of the forenoon session. It is a tremendous legal battle and every point is being pressed with great earnestness. Hundreds of books are being quoted by the respective counsel. The arguments are attracting the very closest attention, and the Court room is daily thronged with spectators. It is conceded on all sides that the ruling of the Judge on the point now being argued will virtually determine the litigation between the two parties. If the Alb:on cannot overthrow the St. George patent, it is sure to lose the case. If the Court allows the Albion to introduce testimony showing that said patent was irregularly issued, the result cannot be doubtful. This is the precise situation as the case stands at this writing. W. S. Wood closed his argu-

Every John declares that he is sixty years of age, or a mere callow youth, and he looks on the Assessor is the most glaring nuisance in this era of railroad building. Flanagan has studied the economical habits of the celestial, and in order to prevent mistakes has adopted the following plan: Cookes and Evans were turned eose tandem fashion, so to speak When Cookes finished canvassing den for his beautiful receipts, Evans immediately followed into the same house. This was to prevent the trans ferring of receipts from one to another At the same hour and minute Cap, was working the railroad. The town receipts and those issued to the road ands had different marks, and this made it a very hard game for the thrifty celestal. There were 296 Chinese on the railroad, and 13 receipts were subscribed for in town.

A Wild Cat Asks Pity.

Quite a crowd walked out near the foundry, braving the danger of a sunstroke yesterday, in order to see Matt Reihm's wild cat turned loose. Four dogs were taken along to entertain the cat. When turned loose the dogs refused to join issue. The cat saw that and finally crept to the feet of a Humgaged to put the animal back in its it to death.

California Crops. An old Washoeite just up from Alameda county, Cal., says that money is getting very plentiful in that region. The crops are very light in Contra Costa and Alameda counties. Thousands of acres of grain have been cut for hay, giving a very poor yield. This was caused by excessive rains in the winter and the prevailing drouth since February. Hay is chesp, however, in that section. In Livermore the farmers will give half a stack of hay for the baling.

Reports from many sections of the valley show that the hoppers are becoming discouraged, and resolve not to invest any more eggs in Washoe west and south. Places which were s short time ago covered with hoppers traveled.
